## WESTERN DIGITAL / REDESIGN OF DIGITAL SUBBRAND PRESENCE 2024

Redesign of digital presence of a group of market-leading products. From service icons, to emails and banners.

#### Stage 1 / Brief

After new logotype for Western Digital officially approved, client requested a complete redesign of product offer. The range was to be reduced to 5 products, since WD\_Black became it's own brand. Previous design was based on recoloured lifestyle photography and range icons set.

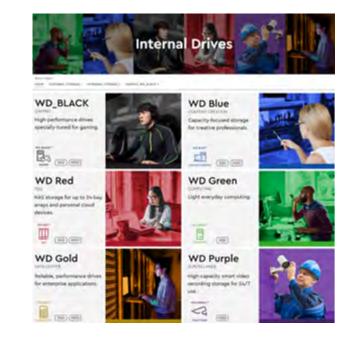

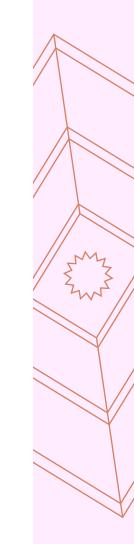

to give depth to backgrounds and holding devices.

Icons were redesigned from outline to fill, using the same colour palette as

previously, however the colour scheme was widened by four additional hues

#### Stage 2 / Packaging labels

Colour palette and rounded triangular shape from new Western Digital logotype formed a starting point for development of hard and solid state drives labels and creating and retouching mockups.

Ae

#### Stage 3 / Key arts

When all the packaging and colour scheme elements were ready, the next stage was to create key visuals, comprising new selection of lifestyle images.

#### Stage 4 / Banners

The next step was to develop basic set of banners in Skyscraper, MPU and Leaderboard formats.

#### Stage 4 / Landing page, Amazon template, lookbook and LinkedIn

After banners approval client requested design of other elements of brand styleguide: lookbook to define usage of the new icons and colour scheme; Amazon product page template and landing page for all the products range. Keyarts were used for designing LinkedIn advertising.

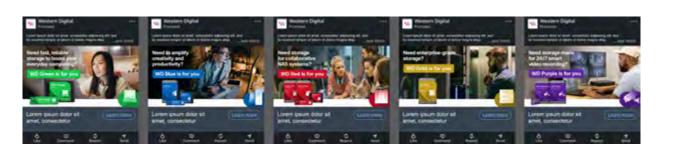

#### Stage 4 / Emails

The next step was development of product range emails for consumer and resellers.
